

Making a Lasting Contribution to Environmental Health and Well-Being in Canadian Agriculture

Coast to coast, agricultural industries support growers in their quest for healthy crop and animal production, and in their commitment to promoting the sustainability of farm communities. Membership in the non-profit agriculture industry stewardship organization, Cleanfarms, is one way they do this.

Through Cleanfarms, members recover ag plastic products and packaging for recycling, and unwanted, old pesticides, farm animal health medications, and crop input packaging for safe disposal. These Cleanfarms programs make a positive impact on the sustainability of farming and the health of our environment. Thank you, Cleanfarms members.
